ARIZONA CORPORATION COMMISSION  
DOCKET CONTROL

Re: Docket # W-04015A-12-0050  
W-04015A-12-0051

I am addressing my concerns to the Arizona Corporation Commission concerning the Sunland Water Company proposed water rate increase:

1. I am disabled, handicapped, and on a fixed income. A rise in the water bill of the proposed amount would leave me without food and my necessary medications. I would not object so much if the monthly base rate included some water but it does not.
2. Mine was one of the 62 signed letters that staff has misplaced, but many of my neighbors will not have the time or means to write again and include 13 copies!
3. The water is often turned off without warning for the guys to dig out and fix water leaks as the road surface is inadequate for the pipes.
4. I have low kidney function and may have to turn to more expensive bottled water to avoid the new chemical contaminants of lead and nitrites in the combined new well water.
5. I am concerned about house fires in our community because of my inability to exit my house quickly as we have no fire hydrants and Paul Sabel of the Arizona City Fire station, only 4 miles away, has said he will not answer fires in our community. He says our fire station is over 35 miles away on the other side of Casa Grande. For Sunland Water Company to increase our fess, what do you plan to do about our needed fire protection?

Sincerely,

Paulette Antone

Arizona Corporation Commission
